EDUCATION

City University of Science and Information Technology   Peshawar, Pakistan
Software Engineering Bachelors   August 2019 - November 2023
CGPA: 3.06

EXPERIENCE

Authornate | Full Stack Developer   Islamabad, Pakistan | July 2024 - Present

At Authornate Pvt Ltd, I worked as a Fullstack Developer building scalable web and mobile apps using Next.js and React Native. I integrated Web3 features using Ethers.js, enabling wallet authentication, token-gated access, and smart contract interactions. My work included both frontend and backend logic, using secure APIs and serverless functions. I focused on creating smooth user experiences while connecting apps seamlessly to blockchain services.

The nexus | Full-Stack Web Developer   Peshawar, Pakistan | June 2023 - October 2024

As a Full-Stack Developer at nexus Hotel Apartments, Peshawar, I spearheaded the development and maintenance of the web application, ensuring alignment with evolving requirements and industry standards. Collaborating closely with stakeholders, I implemented essential features and optimized performance to enhance user experience. Proactively identifying areas for improvement, I proposed innovative solutions in a dynamic team environment, achieving project goals efficiently.

BitCoderLab | Frontend Developer   Peshawar, Pakistan | March 2023 - July 2024

At BitCoderLab Pvt Ltd, I served as a Next.js Developer, where I played a pivotal role in building robust, scalable web and desktop applications. My work included developing a Learning Management System (LMS) for SBBWU using Electron, along with contributing to innovative platforms like Impact Match. By employing modern frameworks and best practices, I ensured the delivery of user-centric, high-performing solutions that catered to diverse needs and industries.

Databases:	MySQL, CockroachDB, Supabase, MongoDB, Firebase

PROJECTS / OPEN-SOURCE

TrinityPad | Link   *Nextjs, React Native, Expressjs, Ethersjs, mongoose, MongoDB*

TrinityPad | Full-Stack Developer
Built a React Native mobile app for decentralized team collaboration.
Contributed to the web version using Next.js and Tailwind CSS.
Integrated Privy wallet authentication and Ethers.js for secure Web3 onboarding.
Deployed using Firebase and implemented Zustand for global state management.

Impact Match | Link   *React, styled-components, Socket.io, scss*

Created a matchmaking platform connecting NGOs, donors, and volunteers.
Developed using Next.js (frontend) and Node.js with MongoDB (backend).
Enabled secure logins, profiles, and opportunity listings.
Integrated dynamic filtering, messaging, and analytics dashboard.

The nexus Hotel Apartments | Link *React, Node, Express, Mongoose, MongoDB, Firebase, Nodemailer, Twilio, React Native, Google Maps API Maps*

Built a fully responsive hotel listing website for a real estate business.

Designed and developed using React and Tailwind CSS.

Integrated booking details and contact functionality for client inquiries.

Delivered the project within one week based on a Figma design.

CarMed Vehicle Services | Link *Next, Prisma, Mongoose, MongoDB, Firebase, Google Maps(React), Formik , Yup*

Built a full-featured car rental platform with a responsive and intuitive UI.

Used Next.js and Tailwind CSS for the frontend; integrated Firebase for backend services.

Implemented car listings, booking functionality, and admin management.

Enabled real-time updates, authentication, and cloud-hosted data storage.

Prism (GameGPT) | Link *React Native, Vercel Functions, styled-components, Firebase, Supabase*

Building a mobile app that lets users generate educational games powered by GPT-based AI.

Developed with React Native CLI for enhanced native performance and platform control.

Integrated dynamic prompt handling and AI-driven game logic using OpenAIs API.

Focused on delivering engaging, responsive UI with custom animations and cross-platform support.
